

EMERGENCY DRILLS

When an emergency alert is released from the Jackson-Hinds Emergency Operations Center via alert radio receivers notifying schools of an emergency condition due to threat of attack or other natural and/or man-made emergency conditions, the procedures are to be followed as the alert message dictates.

The outdoor sirens which are strategically located in the Jackson area are used by the Jackson-Hinds Emergency Operations Center to inform the public of emergency conditions. n

EBAB

Most of our tornados come from the southwest and the walls of a building struck by a tornado are usually thrown outward by expanding area within the building and then blown away.

Tornado drills should be held with all occupants of the building participating two times per year. .

Section IV: INSRTUCTIONS TO STAFF FOR TORNADO WARNINGS

If possible, turn off the gas supply to the building.

Stoves, laboratory and shop equipment should be turned off.

Pupils and school personnel should remain in the Tornado Warning Posture until the responsible administrator has determined that there is no further threat from the identified tornado.
